Dear Sir/dear Madam,

I am writing to you from Switzerland (central Europe) and have some questions for President Obama, about a very important issue, that involves the entire world:  
the extraterrestrial presence on our planet and its implications.

In 1978 the UN General Assembly took the following decision: 33/426 "Establishment of an agency or a department of the United Nations for undertaking, co-ordinating and disseminating the results of research into unidentified flying objects and related phenomena." (<http://tinyurl.com/yfkqgdgd> )

Since that year, some initiatives have been taken by distinct nations (Great Britain, Brazil, Canada, Ecuador, Denmark, ...opened their archives containing their UFO files) and by private institutions (Geipan released the COMETA report <http://www.cnes-geipan.fr/documents/Cometa.pdf> ).

But no extensive effort has been made to co-ordinate and disseminate the result of this field's research on a FORMAL LEVEL.

Since President Obama has been elected, he received a big amount of letters, fax and emails, asking him to be the President who will undertake this task.

Now, these are my questions to the President:

- In light of the Administration's commitment to open, transparent government, what is the President's response to these thousands of requests for formal acknowledgement of an extraterrestrial presence engaging the human race?
- Will the Administration respond to the repeated call from former Clinton chief of staff and co-chair of Obama's transition team, John Podesta, for the release of all UFO files in government hands into the public domain?
- Has the President been briefed about Laurance Rockefeller's three-year effort to get President Clinton to release all UFO files in government hands into the public domain?
- Tens of thousands of UFO related files have recently been released into the public domain by France, Canada, the United Kingdom, Denmark, Sweden, Brazil and other countries. Why hasn't the United States done the same?
- What is the Administration's response to Apollo 14 astronaut Dr. Edgar Mitchell's call for the Administration to release all UFO documents in government files and to acknowledge the extraterrestrial presence?
- Has President Obama asked for or been given a complete briefing from his military and intelligence chiefs on what the United States government knows about the UFO/ET issue and what evidence is in the government's hands relating to this issue?
- Does the United States government have in its possession crashed vehicles of extraterrestrial origin? If so, has progress been made in understanding the nature of this technology? And why hasn't this technology been made available for peaceful use at a time of multiple global crises?
- Is the Administration aware of the scores of current and former military and agency employees coming forward with direct testimony regarding events and evidence pointing toward an extraterrestrial presence engaging the human race?

I would welcome my questions being passed on to the President and await a response to the points made.

Thank you for your attention.

Yours faithfully.
